Shipment of New High-Speed Train Cars for Taiwan

Nippon Sharyo, Ltd. (Headquarters: Nagoya City, Aichi Prefecture; President: Mamoru Tanaka; hereinafter “Nippon Sharyo”) is pleased to announce that it will ship the first batch of high-speed train cars for Taiwan to Hitachi, Ltd. (hereinafter “Hitachi”), under an order received from Hitachi.

This project forms part of an order for 12 trainsets (144 cars) of new high-speed trains awarded in May 2023 by Taiwan High Speed Rail Corporation (THSRC) to the Hitachi Toshiba Supreme Consortium (HTSC), consisting of Hitachi and Toshiba Corporation and other companies. Nippon Sharyo is responsible for manufacturing a portion of these cars. The completed cars are based on the most advanced N700S Shinkansen of Central Japan Railway Company (JR Central).

In addition to manufacturing rolling stock for the domestic market, Nippon Sharyo has been continuously engaged in overseas projects and has proceeded with the production of these cars for Taiwan as scheduled, leveraging its extensive experience in high-speed train manufacturing technology and quality control developed over many years.

The cars to be shipped in this batch will be delivered sequentially to THSRC via Hitachi, as previously announced. Nippon Sharyo will continue to prioritize quality and reliability while working closely with all related parties to steadily advance this project.
